DEEPRF POST-CARE INSTRUCTIONS

To make the most of your DeepRF treatment and promote healing, the following post-care steps are recommended. Always talk to your provider about any questions and concerns that arise.

APPLY FIRMING BODY LOTION

Gently massage the treated area with the Firming Body Lotion. Use the lotion twice a day in between treatment sessions. At the conclusion of your sessions, use the Firming Body Lotion until any micro-scabs have resolved.

DO NOT DISTURB

It is common for micro-scabs to form at the treatment site. These are a part of the healing process and should be left to disappear on their own.

ADJUSTMENTS TO YOUR DAILY ROUTINE

- Use a gentle cleanser and cool water to keep the skin clean
- Avoid sun exposure and always use SPF
- Avoid strenuous exercise for 1-3 days
- Ask your provider when to resume your skincare regimen and any products to avoid
